

Cross Base Highway Information

The Pierce County Comprehensive Plan has identified Frederickson as a major employment center. The Cross-Base Highway will provide a link in the regional transportation system by connecting I-5, existing and future residential areas in mid-Pierce county, with the Frederickson industrial area.

When complete, the Cross-Base Highway (SR-704) will provide travelers with a six-mile long, multi-lane highway beginning at the I-5 Thorne Lane Interchange at the west end, connecting to 176th Street at SR7 at the east end.
